

Performance Report

2014

Message of the Minister of Health, Nutrition and Indigenous Medicine

At a time when our motherland is marching towards a new way under a people-friendly leadership flashing its glory in to all corners of the world, as the Minister of Health and Indigenous Medicine, I take immense pleasure in delivering this message to the 'Performance Report' annually compiled by the Department of Ayurveda.

In an era, when the Sri Lankan nation with a proud history is forgetting its uniqueness, the Department of Ayurveda is dedicated towards the enormous responsibility of endowing the benefits of 'Ayurveda' to the future generation. The guardian deities of this endeavour are the Ayurveda Medical Officers. It should be commendable, all people-friendly programmes launched by the Department of Ayurveda in collaboration with the Ministry of Health and Indigenous Medicine including protection of wild medicinal herbs and to secure the unique heritage of 'Ayurveda' in realizing the noble intention of upholding indigenous medicine while uplifting health standards of persons not limiting to our motherland but extending it towards the world community.

No wealth in this world can be paralleled with health. Because illnesses degrade ourselves physically as well as mentally. Hence, it would be wise to prevent diseases than to heal them. Vital component of assured health is the cleanliness of the environment we live. Healthy person has everything. Therefore, 'Ayurveda' is invaluable and it serves people immensely. It reminds me the ancient saying "Kingship or else Healing", which is more meaningful.

We should not forget the 'State Ceremony of Anointing Oil' annually organized on a grand scale by the Department of Ayurveda along with the Ministry of Health and Indigenous Medicine following ancient rituals concentrating on health of all living beings.

I offer my commendations to all the staff led by the Commissioner of Ayurveda, who has guided the compilation of this 'Performance Report' and wish the Department of Ayurveda of success in all endeavours and wish each activity performed by the Department of Ayurveda in creating a environment-friendly healthy person and reviving our ancient deteriorating heritages and thereby gloryfying Ayurveda in the world, will be for the betterment of the public.

Dr. Rajitha Senarathna
Minister of Health, Nutrition and Indigenous Medicine

Message of the Deputy Minister of Health, Nutrition and Indigenous Medicine

As the Deputy Minister of Health and Indigenous Medicine, I am privileged to deliver this message to the 'Performance Report' prepared by the Department of Ayurveda at a time when Sri Lanka is in its forwardmarch towards its goal under the vision and mission of H.E. the President and Hon. Prime Minister giving priority to native values while triumphing the confidence of Sri Lankans as well as of the international community.

In the present era, the miraculous effect of Ayurveda has been glorified by using the unique wisdom of indigenous medicine for physical and psychological health of the entire world population. The Department of Ayurveda has shouldered to realize this enormous task.

Public has been immensely benefitted by the clinics conducted in Ayurveda Hospitals established in various provinces of the island. Furthermore, herbal gardens established under the Department of Ayurveda provides knowledge on medicinal plants to students as well as any other interested party. In addition, the Department of Ayurveda performs diverse social responsibilities. Distribution of medicinal plants and books on indigenous medicine to schools and religious institutions and providing free medicinal drinks on special occasions are some among them.

I feel proud to announce of the State Ceremony of Anointing Oil organized annually by the Department of Ayurveda and the Ministry of Health and Indigenous Medicine as anational cultural event. Our foremost expectation is the health of people.

All religious leaders has preached that protecting nature is the prime obligation of al citizens of the world because medicinal plants and Ayurveda maintain an unbreakable unique relationship.

Guidance and leadership provided by the Commissioner of Ayurveda and the collaborative effort of the entire staff of the Department of Ayurveda in preparing ths 'Performance Report' meaningfully, accurately and credibly in every calendar year, should be commendable and I wish that the Department of Ayurveda could serve the public better through Ayurveda and thereby to glorify tha name 'Sri Lanka' around the world.

Fizzal Caseem

Deputy Minister of Health, Nutrition and Indigenous Medicine

Message of the Secretary to the Ministry of Health, Nutrition and Indigenous Medicine

Department of Ayurveda established under the Act No 31 of 1961 in collaboration with the Ministry of Health and Indigenous Medicine contributes to the development of hospital services, research activities, educational trainings and herbal gardens. Several institutions; namely, Bandaranaike Memorial Ayurveda Research Institute, National Institute of Indigenous Medicine, Teaching Hospitals, Ayurveda Hospitals and Research Hospitals have been established under the Department of Ayurveda. Furthermore, the Department maintains 7 herbal gardens while the Ayurveda Medical Council registers Ayurveda Medical Officers.

This Performance Report contains the progress of the functions of the Department including establishment activities of Ayurveda Medical Officers, other officers and minor employees, pharmaceutical manufacturing, maintenance and control of stocks, promotion and raising awareness on indigenous medical practices, publication of books and leaflets, conducting examinations, research activities, cultivation of medicinal herbs and promotion of the use of medicinal herbs.

I appreciate the effort of the Department of Ayurveda in obtaining due recognition for Ayurveda, Unani, Siddha and Homeopathi medical practices popularizing Ayurveda medical practices locally and internationally and wish every success in its future endeavours.

Anura Jayawickrama

Secretary

Ministry of Health, Nutrition and Indigenous Medicine

Message of the Commissioner of Ayurveda

This Performance Report contains a brief account of the progress of the development projects implemented by Department of Ayurveda during the previous year.

During the period I have focused on developing human resources of the Department in knowledge, skills and attitudes. Accordingly, new recruitments, promotions, approving of new cadre, grading of posts and providing local and foreign trainings and seminars have been conducted.

We cannot provide quality and efficient public service only with the development of human resources but the physical resources too should be upgraded. Accordingly, new constructions have been commenced and the Trincomalee Ayurveda Hospital has been one such new constructions. In addition, existing buildings have been renovated.

Priority has been given for projects and programmes conducted by this Department to popularize indigenous medicine. Under this project, mobile medical clinics, Ayurveda exhibitions and popularization of local drinks have been conducted.

Our expectation is to provide better public service and thereby to lessen the rapidly growing congestion in hospitals. I believe that it would assist the maintenance of healthy work force required for the development of this country.

I am grateful to the Hon. Minister and Deputy Minister for their valuable guidance and shall offer my commendations to the entire staff of the Ministry as well as of the Department of Ayurveda for their strenuous effort.

P.S.K.R. Weerakoon

Commissioner of Ayurveda

Department of Ayurveda

Introduction

Ayurveda can be defined as the science of providing guidance for healing, prevention of diseases and living a healthy life with a better philosophy of life.

In ancient times, the Indians who settled in Sri Lanka as a result of close relations we had with India have introduced Ayurveda to this country. Indigenous medical system contains unique cultural and ethical features of this country.

Department of Ayurveda established under the Ayurveda Act No 31 of 1961 is the most prominent institution performing the responsibility of the Ministry of Indigenous Medicine.

This Performance Report contains a brief account of the progress in performing the functions and administrative responsibilities entrusted to the Department of Ayurveda during year 2014.
